

An-ion based room Air Purifier - AIP-02

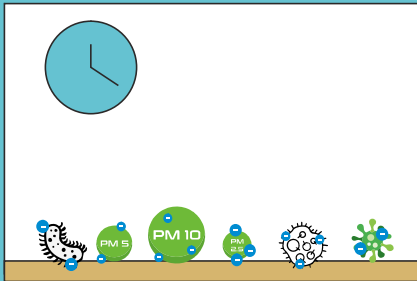

How do Air Ionizers work?

1. Air Ionizer diffuses negatively charged ions in air.

2. Negative Ions attach & charge the particulate matter, airborne bacteria, virus etc.

3. Charged particle has tendency to settle & attach to surfaces & so risk of infection is reduced.

The model AIP-02 is designed to be a commercial use Air Purifier for use in Hair Salons, Store Fronts, Office cubicles, clinics, reception desks and any other places where users want to sanitize the air.

Model AIP-02 comes with an air suction unit inside, which makes it work faster than the handy model AIP-01. It is also equipped with Dual Air Ionizer modules to match to speed of suction. This model is designed to be a low cost solution and targeted to optimally cover an area of 8 ft X 8 ft which can suit most of the commercial requirements.

This product is low power consuming and can be kept running 24X7 and 365 days continuously!

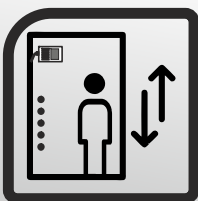

Recommended areas of use:

Cubicle/Work area

Bank Counter/ Store Counter/ Reception area

Lift/Small areas

Doctor Clinic/ Consultation table

Restaurant/ Meeting Area

Specifications

Part Number:

AIP-02

Power Supply:

Input:	230V AC
Power:	3-4 Watts

Dimensions:

Length:	200 mm
Breadth:	75 mm
Height:	120 mm

Working Principle:

Dual Negative Ion Generators with forced air
